

Call for applications

3rd annual Thermo Scientific Tandem Mass Tag Research Award

Receive up to \$10,000 worth of these products free*

About the research awards

- Research award includes Thermo Scientific™ mass spectrometry (MS) reagents and Thermo Scientific™ TMT10plex™ labeling reagents
- For more information and to download the application, go to thermofisher.com/tmtgrant
- Applications accepted September 18, 2016–January 31, 2017

Grant award levels

- **Gold**—\$10,000 • **Silver**—\$7,500 • **Bronze**—\$5,000

Describe how you could use the Thermo Scientific™ TMT10plex™ Isobaric Label Reagent Set in conjunction with other MS reagents in your research for the chance to receive one of three awards for up to \$10,000 worth of these reagents to use in your research.*

The top three recipients will be selected by a panel of judges from Thermo Fisher Scientific and Proteome Sciences, based on the innovativeness and potential impact of the applicant's proposed use of the Thermo Scientific™ Tandem Mass Tag™ (TMT™) reagents. Award recipients will be recognized during a Thermo Fisher Scientific–sponsored event at the American Society for Mass Spectrometry (ASMS) annual conference in Indianapolis, Indiana on June 4–8, 2017.

About the technology

A successful proteomics experiment requires the integration of proper sample preparation, instrumentation, and software. In addition to these tools, a proteomics scientist also needs to determine strategy to achieve the intended goals. We offer a variety of solutions for protein mass spectrometry, sample preparation, and protein quantitation.

Isobaric chemical tags are powerful tools that enable multiplexed identification and quantitation of thousands of proteins from different samples using tandem mass spectrometry. The TMT10plex reagents contain 10 different isobaric compounds that enable up to 10 different protein samples prepared from cells or tissues to be labeled in parallel and then combined for analysis. Tandem Mass Tag labeling reagents consist of a mass normalizer, reactive group that covalently labels the target of interest, and a mass reporter for relative quantitation. During the second MS/MS fragmentation, each isobaric tag produces a unique reporter ion signature for multiplexed quantitation. For each sample, a unique reporter mass (i.e., TMT10plex Tag, 126–131 Da) in the low-mass region of the high-resolution MS/MS spectrum is used to measure relative protein expression levels during peptide fragmentation and tandem mass spectrometry. Peptide quantitation is then accomplished by comparing the intensities of the 10 reporter ions in the MS/MS spectra.

The tags have been optimized for use with high-resolution MS/MS platforms, such as the Thermo Scientific™ Orbitrap Fusion™ Tribrid™, Orbitrap Velos Pro™, Orbitrap Elite™, and Q Exactive™ systems with data analysis fully supported by Thermo Scientific™ Proteome Discoverer™ 2.1 Software.

The following products are eligible for the Thermo Scientific Tandem Mass Tag Research Award. Award recipients may use up to 50% of grant funding toward Thermo Scientific TMT10plex label reagents or kits.

Calibration solutions and standards	Quantity	Cat. No.
<input type="checkbox"/> Pierce Peptide Retention Time Calibration Mixture, 0.5 pmol/μL	50 μL	88320

* No purchase necessary to enter or receive a grant. To enter the Thermo Scientific Tandem Mass Tag Research Grant Program (the "Program"), you must submit your Grant Application (the "Application") at thermofisher.com/tmtgrant between 12:01 a.m. PT on September 18, 2016 and 11:59 p.m. PT on January 31, 2017. The Program is open only to academic, not-for-profit research institutions or commercial entities in an eligible jurisdiction whose representative has submitted a completed Application. **The person submitting the Application (the "Applicant") is entering on behalf of their employer, which will be the recipient of the grant (the "Grant Recipient").** The Program is open only to Applicants who are new or novice users of Thermo Scientific Tandem Mass Tag reagents or Thermo Scientific TMT reagents. Determination of eligibility is at Sponsor's sole discretion. Void in Quebec, Australia, India, and where this promotion or acceptance of a grant is prohibited or restricted by law or subject to registration or other procedures with which Sponsor may not have undertaken. **Individual Health Care Professionals (HCPs) may not participate in this promotion. The term Health Care Professionals or HCPs includes individuals (clinical or non-clinical physicians, physician assistants, nurses, technicians, research coordinators, administrators and purchasing personnel) and entities (including hospitals, rehabilitation centers, nursing facilities, home health agencies, clinics and group purchasing organizations, managed care organizations, physician group practices, medical directors for health insurance organizations, diagnostic institutions) and their employees and representatives who are involved in the actual provision of health care services.** All grant proposals must be submitted in the English language. Other eligibility restrictions apply. Three Grant Recipients will be selected to receive a product credit for Thermo Scientific TMT10plex and MS reagents in the amount of \$10,000 USD for the first place winner, \$7,500 USD for the second place winner, and \$5,000 USD for the third place winner (or equivalent in the local currency of the Grant Recipient) (the "Award"). Winners will be selected by a panel of five judges comprised of R&D professionals employed by the Sponsor or Proteome Sciences. Applications will be judged on the following criteria, each worth 33% of the total score:

- Scientific merit: use of novel applications in quantitative proteomics to achieve their goals by using TMT10plex and MS reagents
- Significance of use of Thermo Scientific TMT tags and commercial MS reagents: how using TMT10plex labeling reagents will further their research
- Approach: how clear and well-developed is the proposed use of the TMT tags and MS reagents to address the questions at hand

All qualifying applications will be anonymized prior to presentation to the judges. The Applicants for the winning Grant Recipients will be notified of their selection on approximately March 31, 2017. The Applicant will be required to execute and return an Affidavit of Eligibility/Release of Liability/Assignment of Rights/Publicity Release (where legal) and the Grant Recipient will be required to execute and return an Acceptance of Grant document. The complete Official Rules, including grant proposal requirements, are available at thermofisher.com/tmtgrant. In case of any inconsistency between these short rules and the complete Official Rules, the complete Official Rules will always prevail.
