Product Specific Information

This antibody recognizes the murine integrin beta 3 subunit (CD61), approximately a 90 kDa a type I membrane protein, expressed primarily on megakaryocytes, platelets, monocytes, macrophages, granulocytes and endothelial cells. CD61 associates with either the alpha IIb integrin (CD41) or the alpha V integrin (CD51) to form the platelet glycoprotein complex IIb /IIIa and the vitronectin receptor (VNR) respectively.
