p53 Antibody (MA5-12571) in WB

Western blot was performed using Anti-p53 Monoclonal Antibody (DO-1) (Product # MA5-12571) and a ~53 kDa band corresponding to TP53 was observed across cell lines tested . Whole cell extracts (30 µg lysate) of A-431 (Lane 1), T-47D (Lane 2), SK-O-V3 (Lane 3), HL-60 (Lane 4), U-937 (Lane 5) were electrophoresed using NuPAGE™ 4-12% Bis-Tris Protein Gel (Product # NP0321BOX). Resolved proteins were then transferred onto a nitrocellulose membrane (Product # IB23001) by iBlot® 2 Dry Blotting System (Product # IB21001). The blot was probed with the primary antibody (1:1000) and detected by chemiluminescence with Goat anti-Mouse IgG (H+L) Superclonal™ Recombinant Secondary Antibody, HRP (Product # A28177,1:20000) using the iBright™ FL1500 Imaging System (Product # A44115). Chemiluminescent detection was performed using SuperSignal™ West Atto Ultimate Sensitivity Substrate (Product # A38556).

p53 Antibody (MA5-12571)

Antibody specificity was demonstrated by CRISPR-Cas9 mediated knockout of target protein. A loss of signal was observed for target protein in p53 KO cell line compared to control cell line using Anti-p53 Monoclonal Antibody (DO-1) (Product # MA5-12571). {KO}

p53 Antibody (MA5-12571)

Antibody specificity was demonstrated by detection of differential basal expression of the target across cell lines owing to their inherent genetic constitution. Relative expression of TP53 was observed as increased expression in A-431 and T-47D as compared to in other cell lines using Anti-p53 Monoclonal Antibody (DO-1) (Product # MA5-12571) in Western Blot. {RE}
