Advanced Verification Data

p35 Antibody (MA5-14834)

Antibody specificity was demonstrated by detection of differential basal expression of the target across tissues owing to their inherent genetic constitution. Relative expression of p35 was observed in Mouse Brain, Rat Brain and Mouse Skeletal Muscle, where Mouse Skeletal Muscle is reported negative for p35 expression using Anti-p35 Monoclonal Antibody (Product # MA5-14834) in Western Blot. Relative expression validation info.

Experimental neurobiology

Abnormal Mitochondria in a Non-human Primate Model of MPTP-induced Parkinson's Disease: Drp1 and CDK5/p25 Signaling.

"MA5-14834 was used in Western Blotting to suggest that the phosphorylation of Drp1(S616) by CDK5 is involved in mitochondrial fission in the substantia nigra of MPTP-induced Parkinson's Disease in a non-human primate model."
