Product Specific Information

This antibody detects both LC3A and LC3B. Western blot bands are seen at ~19 kDa, representing LC3-I, and ~17 kDa, representing LC3-II. The observed molecular weight of the protein may vary from the listed predicted molecular weight due to post translational modifications, post translation cleavages, relative charges, and other experimental factors.

Recommended positive controls: LC3B overexpression lysate, mouse brain whole tissue lysate (adult whole normal), human brain whole tissue lysate (adult whole normal), Neuro2a whole cell lysate, Neuro2a Chloroquine-treated/untreated cell lysate, HeLa chloroquine-treated/untreated cell lysate

This antibody is predicted to react with Bovine based on 100% sequence homology.

LC3A/LC3B Antibody (PA1-16931) in ICC/IF
Immunofluorescent analysis of LC3 in untreated HeLa cells (left panel) and HeLa cells treated with 50µM CQ overnight (right panel). Cells were fixed for 10 min using 10% formalin and permeabilized for 5 min using 1X PBS with 0.05% Triton X-100. Cells were incubated with anti-LC3 polyclonal antibody (Product # PA1-16931) at 5 µg/mL overnight at 4°C, followed by detection using an anti-mouse DyLight 488 (Green) at a dilution of 1:500. Nuclei were counterstained with DAPI (Blue). Cells were imaged using a 40X magnification.
