

# alpha-ENaC Polyclonal Antibody

Catalog Number PA5-29136 Product data sheet

Details	
Size	100 μL
Host/Isotope	Rabbit / IgG
Class	Polyclonal
Туре	Antibody
Immunogen	Recombinant fragment corresponding to a region within amino acids 272 and 555 of Human SCNN1A
Conjugate	Unconjugated
Form	Liquid
Concentration	1 mg/mL
Purification	Antigen affinity chromatography
Storage buffer	PBS, pH 7, with 20% glycerol
Contains	0.01% thimerosal
Storage Conditions	Store at 4°C short term. For long term storage, store at -20°C, avoiding freeze/thaw cycles.

Species Reactivity	
Species reactivity	Human, Mouse
Tested Applications	Dilution *
Immunohistochemistry (Paraffin) (IHC (P))	1:100-1:1,000
Western Blot (WB)	1:500-1:3,000

<sup>\*</sup> Suggested working dilutions are given as a guide only. It is recommended that the user titrate the product for use in their own experiment using appropriate negative and positive controls.

#### Product specific information

Recommended positive controls: 293T, mouse kidney. Predicted reactivity: Mouse (84%), Rat (85%), Pig (85%), Rabbit (89%), Bovine (85%), Guinea pig (83%). Store product as a concentrated solution. Centrifuge briefly prior to opening the vial.

### Background/Target Information

Epithelial sodium channels are amiloride-sensitive members of the degenerin/epithelial sodium channel (Deg/ENaC) superfamily of ion channels. Members of this superfamily of ion channels share organizational similarity in that they all possess two short intracellular amino and carboxyl termini, two short membrane spanning segments, and a large extracellular loop with a conserved cysteine-rich region. There are three homologous isoforms of the ENaC (alpha, beta, and gamma) protein. ENaC in the kidney, lung, and colon plays an essential role in trans-epithelial sodium and fluid balance. ENaC also mediates aldosterone-dependent sodium reabsorption in the distal nephron of the kidney, thus regulating blood pressure. ENaC is thought to be regulated, in part, through association with the cystic fibrosis transmembrane conductance regulator (CFTR) chloride ion channel. Gain-of-function mutations in beta- or gamma-ENaC can cause severe arterial hypertension (Liddel's syndrome) and loss-of-function mutations in alpha- or beta-ENaC causes pseudohypoaldosteronism (PHA-1).

Products are warranted to operate or perform substantially in conformance with published Product specifications in effect at the time of sale, as set forth in the Production documentation, specifications and/or accompanying package inserts ("Documentation"). No claim of suitability for use in applications regulated by FDA is made. The warranty provided herein is valid only when used by properly trained individuals. Unless otherwise stated in the Documentation, this warranty is limited to one year from date of shipment when the Product is subjected to normal, proper and intended usage. This warranty does not extend to anyone other than the Buyer. Any model or sample

NO OTHER WARRANTIES, EXPRESS OR IMPLED, ARE GRANTED INCLUDING WITHOUT LIMITATION, IMPLED WARRANTIES OF MERCHANTABILITY, FITNESS FOR ANY PARTICULAR PURPOSE, OR NON INFRINGEMENT, BUYER'S EXCLUSINE REALED FOR ROCKETOR POR REFUNDED FOR ROPE OF REFUNDED FOR PROBLEMENT, BUYER'S EXCLUSIVE REALED FOR ROCKETOR FOR REFUNDED FOR ROPE OF REFUNDED FOR ROPE

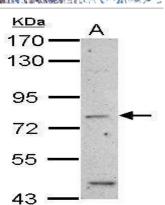

# Product Images For alpha-ENaC Polyclonal Antibody

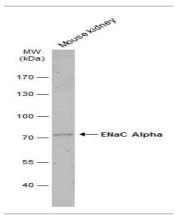

### alpha-ENaC Antibody (PA5-29136) in IHC (P)

Immunohistochemical analysis of paraffin-embedded human colon carcinoma, using SCNN1A (Product # PA5-29136) antibody at 1:500 dilution. Antigen Retrieval: EDTA based buffer, pH 8.0, 15 min.

## alpha-ENaC Antibody (PA5-29136) in WB

Western Blot using alpha-ENaC Polyclonal Antibody (Product # PA5-29136). Sample (30 µg of whole cell lysate). Lane A: 293T . 7.5% SDS PAGE. alpha-ENaC Polyclonal Antibody (Product # PA5-29136) diluted at 1:1,000.

### alpha-ENaC Antibody (PA5-29136) in WB

Western Blot analysis of alpha-ENaC was performed by separating 50 µg of Mouse tissue extracts by 7.5% SDS-PAGE. Proteins were transferred to a membrane and probed with a alpha-ENaC Polyclonal Antibody (Product # PA5-29136) at a dilution of 1:500. The HRP-conjugated anti-rabbit IgG antibody was used to detect the primary antibody.
